

The CEMO DT Mobile Easy Diesel dispenser range is ideal for refilling diesel-powered plant and equipment being used on Construction sites, Farms and other Industrial applications where it is not possible to have a static storage tank.

This product is part of the CAS (Cordless Alliance System) which allows commonly manufactured 18v Lithium Batteries to be used to power the pumps. For more [information on CAS](#) please see the PDF below the product image. All CEMO CAS products can be ordered with or without the battery and charger to allow you to utilise existing CAS charging equipment.

#### The 210 Litre DT-Mobile Easy:

- Can be used under ADR 1.1.3.1c for single-site refuelling by a person in the course of their main business
- Strong polyethene tank body with built-in handles for moving when empty
