

Overview

FX-VV200

FX-VV Permanent Lifting Magnets for beams and profiles

Product number 11010204

Description

FX-VV is the lifting magnet for profiles and hot components.

The long, narrow design is conceived to pick up beams and profiles, also on the inner web of the beam, and reach their maximum holding force even with comparatively thin material thickness, so that even thin sheets can be lifted safely. Thanks to the 90° double prism, angle profiles can now be picked up on the inside and outside, or components can be turned.

Steel fabricators rely on FX-VV.

Product information

Diameter round:	Ø 20-50 mm
Dimensions (mm):	195x64x77
Flat material:	4mm
Product:	FX-VV
Temperature (°C):	150
max. load flat (kg):	200
max. load from flat material:	10mm
max. load round (kg):	100
max. Traglast Profil 90° innen:	100 kg
max. Traglast Profil 90° außen:	120 kg
